APPENDIX	31

I. SUMMARY AND INTRODUCTION

The character of the Mission Hill/Longwood Medical/Fenway-Kenmore area is shaped by large and numerous medical and educational institutions. As job sources, the institutions attract professional, technical and service workers, many of whom are residents or become residents of the area. As service providers, the institutions attract people from all over New England, the nation and far beyond national borders. Thousands of students come to colleges and universities in the Mission Hill/Longwood Medical/Fenway-Kenmore area and reside in the vicinity of those institutions.

The presence of these institutions is reflected in the population and labor force characteristics of the area. The population is young and relatively well-educated. Incomes are low and households are small compared to the City as a whole. The resident workers are more inclined to have professional/managerial/technical occupations than their counterparts in the rest of the City.

In terms of housing, renter-occupied units dominate the Mission Hill/Longwood Medical/Fenway-Kenmore area and most of the housing structures have five or more units. In the last five years, condominium conversions have been numerous in the area.

This demographic/economic profile uses two geographic definitions for the Mission Hill/Longwood Medical/Fenway-Kenmore areas. For population, labor force and housing, six neighborhood statistics areas form a reasonable study area: Fenway (27), Kenmore (28), West Fens (29), Medical Center (45), Mission Hill Projects (46), Top of the Hill-Back of the Hill-RTH-Delle Ave. Terrace (47), see Figure 1. For

Mission Hill/Longwood Medical/Fenway-Kenmore

business establishments and employment by place of work, the data are available by zip code only. Three zip codes (02115, 02215 and 02120, see Figure 2) cover the Mission Hill/Longwood Medical/Fenway-Kenmore area. The latter configuration covers more of the Fenway around Massachusetts Avenue than the combination of neighborhood areas. Otherwise, the two definitions are compatible and are treated as a single study area in the rest of this profile. Demographic data for the individual neighborhood areas are presented in the Appendix.

In addition, a condominium development summary relates to a compilation of census tracts (101.01, 101.02, 102, 103, 104, 808, 809 and 811) and a summary of development projects covers the Fenway-Kenmore planning district (#7) and selected streets in the Jamaica Plain planning district (#9).

II. DEMOGRAPHIC CHARACTERISTICS

Population

The Mission Hill/Longwood Medical/Fenway-Kenmore area (Neighborhood Statistics Areas 27, 28, 29, 45, 46 and 47) had a population of 41,905 in 1980 (see Table 1). The residents were 16 percent black, compared to 22 percent in the City of Boston. However, Asian and Pacific Islanders (4 percent of area total) and persons of Hispanic origin (9 percent) had higher relative representation in the area than in the City.

The residents of the area were young in 1980. Thirty-two percent of the population was 20 to 24 years of age and another 22 percent was 15 to 19 years of age. Citywide, persons in those two age brackets, combined, comprised only 24 percent of the total population. Evidently, a large student population lived near the numerous educational institutions (see Workplaces and Employment, below) in and near the area.

The Mission Hill/Longwood Medical/Fenway-Kenmore area had 15,595 households, most of which were small, nonfamily households (see Table 2). In fact, only 26 percent of the area's households were families, compared to 54 percent in the City, and the area had 1.8 persons per household, compared to 2.4 persons per household in Boston. More than half of all households in the area were comprised of only one person. The large number of persons who lived in group quarters (13,516 or 32 percent of all persons in the area) provides more evidence of a large student population.

Income

The Mission Hill/Longwood Medical/Fenway-Kenmore area had relatively low household and per capita income in 1979 (see Table 3). Again, the student population is reflected in the data. Only 27 percent of all households in the area earned over \$15,000, while 42 percent of households in the City had incomes above that amount. Per capita income was \$5,210 in the area, compared to \$6,555 in the City. Furthermore, 29 percent of the area's families and 35 percent of all persons were below the poverty level. Certainly, not all of the low-income persons were students, especially in Mission Hill Projects (neighborhood number 46). However, many of the area's households were single students who worked part-time, if at all, and had low earnings.

Education

Residents of the Mission Hill/Longwood Medical/Fenway-Kenmore area were well-educated (see Table 4). Seventy-eight percent of the persons 25 years and older were high school graduates, compared to 68 percent in the City as a whole; and one-third had completed four or more years of college, in contrast to one-fifth in the City. In addition, a large portion of the younger adult residents of the area (20-24 years of age) were probably enrolled in local institutions of higher education.

Labor Force

Labor force participation in the Mission Hill/Longwood Medical/Fenway-Kenmore area (55 percent of persons 16 years and over) was somewhat less than in the City (60 percent) in 1980 (see Table 5), but the unemployment rate was relatively low (5.4 percent compared to 6.1

Operators, fabricators, laborers	1,613	33,783
Percent of employed persons	8%	13%

Source: See Table 1.

percent in Boston). For the 20,053 employed persons 16 years and over, managerial, professional, technical, sales, administrative, and service occupations were somewhat more prevalent than for citywide workers. That mix of occupations was related to the industries in which people worked. Notably, 45 percent of the area's working residents were employed in professional and related services, including health care and education (see Table 6).

The means of transportation to work for the area's residents were primarily walking (39 percent) and public transportation (33%, see Table 7A). Only 25 percent traveled to work by car, truck or van, compared to 47 percent for residents of the City as a whole.

Walking to work was most prevalent in the Kenmore (28) and Medical Center (45) neighborhood areas. In fact, 61 percent of the workers living in the Medical Center area walked to work (see Table 7B). These data provide more evidence that workers in the medical and educational institutions tend to reside in the vicinity of their workplaces. Consequently, walking to work takes precedence over transit and, especially, work trips by automobile. If this relationship between workplaces and residents were altered, means of transportation to work and, subsequently, traffic patterns could change in the area.

Housing

Multi-unit, rental housing dominates the Mission Hill/Longwood Medical/Fenway-Kenmore area. Merely 4 percent of the area's units are owner-occupied, compared to 27 percent in the City as a whole (see Table 8). As for size, 84 percent of the area's housing units are in structures of 5 or more units, compared to 43 percent in all of Boston.

1939 or earlier	11,495	151,931
Percent of all units	63%	63%
1960 to March 1980	3,335	39,079
Percent of all units	18%	16%

Source: See Table 1.

Tenants in the renter-occupied housing units in 1980 were quite mobile: Forty-six percent of the householders moved into their units from 1979 to March 1980, in comparison to 32 percent citywide. This is consistent with the large number of college students in the area, most of whom move into the area to attend school.

The Mission Hill/Longwood Medical/Fenway-Kenmore area had a large stock of condominiums as of June 30, 1983. Sixty conversion cases produced 1,237 units, most of which were in the Fenway-Kenmore area (Bay State Road, Beacon Street, Commonwealth Avenue and Park Drive, see Table 9). Most of the development occurred after 1980.

III. WORKPLACES AND EMPLOYMENT

As of 1981, over one thousand private business establishments were located in the Mission Hill/Longwood Medical/Fenway-Kenmore area (zip codes 02115, 02215, and 02120). Those establishments employed over 48,000 workers, or 11 percent of Boston's private employees by place of work (see Table 10). The largest employers were mainly hospitals and universities (see Table 11); those with 500 or more employees accounted for 32,000 jobs in 1983. By type of business, services dominated the local economy, with 72 percent of the area's private employment (see Table 10). Retail trade (17 percent of total) was the only other substantial sector. In contrast, the City's economy was more diverse, with 39 percent of total employment in services, 16 percent in finance, 14 percent in retail trade and 13 percent in manufacturing.

 MASSACHUSETTS MANUFACTURERS, 1984

IV. LARGE DEVELOPMENTS

From 1976-1984, over \$853 million were spent on new construction and rehabilitation of structures in the Mission Hill/Longwood Medical/Fenway-Kenmore area (see Table 12). Medical institutions dominated development over that period, accounting for 68 percent of construction spending. The new and rehabilitated structures amounted to over 2.3 million square feet of space. Second in magnitude, residential construction and rehabilitation amounted to over \$170 million (20 percent of total) for 3,156 dwelling units. Except for cultural and recreational construction (\$36 million or 4 percent of total), development in other categories was of relatively small magnitude.
